

# How to use your Apple computer at home.

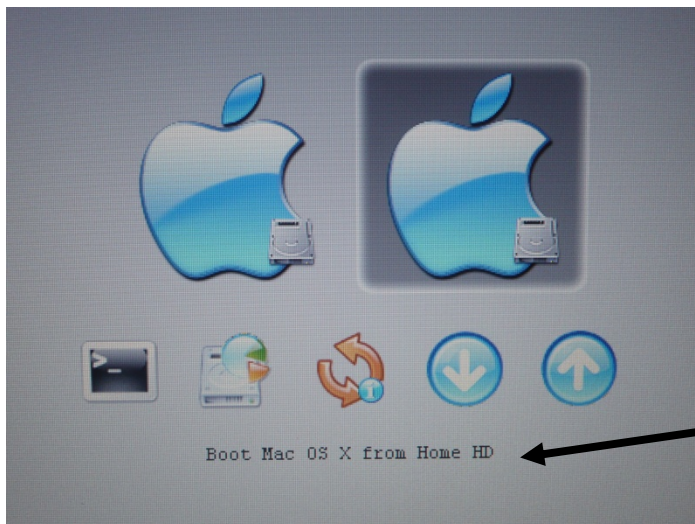

The Apple computer has two mini-hard drives, one is used at school, the other is used at home. To use your computer at home you must select the correct option when you first turn on the computer.

When you turn on the computer, you will see the following screen.

Note this one says  
“Boot Mac OS X from LHS-Mac HD

Use the arrow keys to select the right-hand icon – as shown below.

Note that it says  
“Boot Mac OS X from Home HD

Press Enter and your computer will start up into the Home configuration.

To add your computer to your home network please refer to your ISP configuration details.
